Fibre Smith

METAL HARD TOP

Fiber Smith specializes in jeep hardtops manufacturing. Metal Hardtops are made with heavier and durable materials. Hardtop for your Jeep provides better insulation and protection from natural calamities and exposure. We have multiple options of windows within Hardtop modified as per requirement. All windows are with approved safety glass and colour tinted. It reduces noise pollution drastically and you can carry on your conversation without raising your voice.

**Fibre Smith**

- FRP Dual Layer Hardtop Has PU Injected for Insulation , Hence Making it Noise proof Water proof and more durable than Plastic Company Hardtop
- Two Piece design ensures that there is no water leakage & no Rattling Sound
- Bolt-on Requires no alteration to the Original Body
- Soft Corner Edges

A snorkel's primary use is to allow for cool, dry, clean air to enter into the engine. The snorkel can help prevent water or dirt from entering an engine. Cooler air into the engine can increase its horsepower, improve your engine's performance, and will help to increase the longevity of your vehicle.
